

imnoo

# No. 1 Calculation & Quotation App for CNC Manufacturers

Calculate CNC milling and turning parts quickly and accurately with AI. Marvin, Imnoo's AI, takes the burden off your shoulders when creating quotations. Benefit from the following advantages:

- ✓ Estimate more accurate
- ✓ delivery times. Fewer
- ✓ miscalculations. Create offers
- ✓ faster. Win more orders.
- ✓ More time to complete projects.
- ✓ More enjoyment at work.

Marvin, Imnoo's AI, automatically estimates runtimes

# Why CNC manufacturers must act now

Imnoo and the AI Marvin are solving pressing challenges in the manufacturing industry:

Skilled workers are in short supply, employee turnover is rising, and price sensitivity among buyers is leading to tougher and faster calculations. The internet is bringing transparency: Just-in-time delivery is becoming the standard.

This has unpleasant consequences for every CNC manufacturer. The era of slow and inaccurate Excel calculations is over. Only those who automate their quoting process will remain competitive.

Imnoo with its AI Marvin is the solution. The automatic and highly accurate calculation of machine runtime by Imnoo and Marvin provides:

## Time saving

Anyone who spends 12 to 15 hours a day in the office and has to calculate more than 400 components per month needs efficiency

## Cost reduction

Downtime, overtime, and production bottlenecks are a thing of the past

## Competitiveness

Greater efficiency, better quality and on-time delivery differentiate us from the traditionally calculating competition

## Accuracy

Calculation errors lead to delays and inefficient planning with the conventional method.

## Customer loyalty

Delivery dates are precise and can usually be met. This increases customer satisfaction.

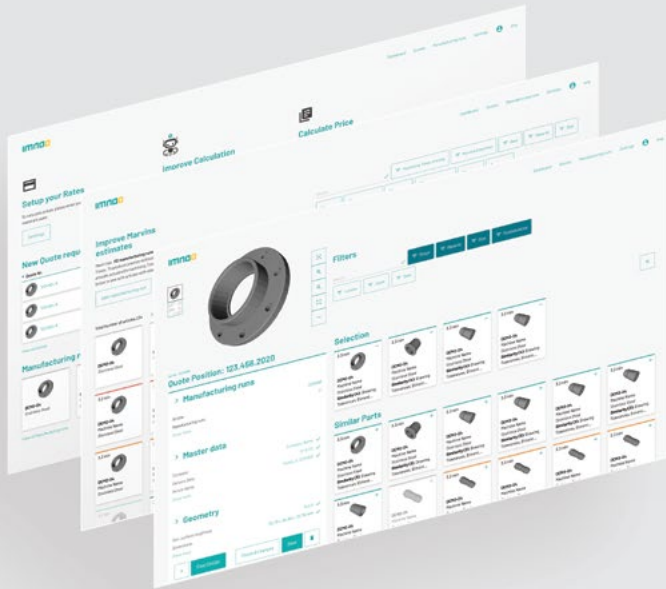

## Knowledge transfer

With Imnoo, you empower your employees and make calculation knowledge available to everyone.

# How does Imnoo make your work easier?

With the modern and digitized quoting and calculation app, you have more time for activities that generate more revenue. These features help you:

- ✓ Automatic cost driver analysis, automatic
- ✓ machine runtime estimation, search and
- ✓ comparison of reference components, in-house
- ✓ webshop with quotation solution, company
- ✓ register for CNC manufacturers, interfaces to
- ✓ ERP systems

# What our customers say

**"5% more profit, thanks to precise CNC calculation without gut feeling!"** Patrik Erb - Erb Mechanik AG, 10 employees

**"After only 10 hours of effort, 70% faster Calculate CNC components!"** Michael Danz - Werner Danz Metallverarbeitung GmbH & Co. KG - 20 employees

**"Despite a large component range, Imnoo calculates 90% of my CNC parts automatically. This saves me 1200 hours per year!"** Heribert Rottler - Schmidt + Bartl GmbH 30 employees

**CNC manufacturers in over 14 countries rely on Imnoo**
